

Dear,

ERG is developing a first-of-its-kind program to make it easier than ever to view and compare the embodied carbon of products with confidence, simplifying the process of sustainable purchasing decision-making.

We are excited to share more information about our program, including two documents that will serve as its technical foundation:

- [ERG's Approach to Implementing the Product Category Rule Criteria](#)
- [ERG's Environmental Product Declaration Requirements](#)

Learn more about the program at [www.erg.com/epd](http://www.erg.com/epd).

Our goal is simple: fill the market need to standardize the way embodied carbon data is disclosed and calculated, allowing similar products to be reliably compared.

ERG is uniquely positioned to lead thanks to decades of technical expertise, deep relationships with key stakeholders, and our experience as EPA's previous contractor on embodied carbon work in construction.

We invite your comments on both documents. Your feedback will help us refine our approach and launch a program that meets the needs of project owners, purchasing officials, and anyone else interested in making more sustainable purchasing decisions.

Email [EPDQuality@erg.com](mailto:EPDQuality@erg.com) to comment or learn more about the program.

Sincerely,

ERG's EPD Quality Label Program
